

FLOBULL AERATORS

FLOBULL
ORIGINAL SYSTEM

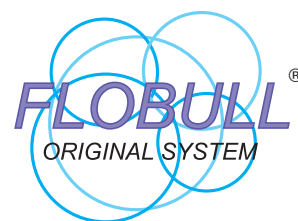

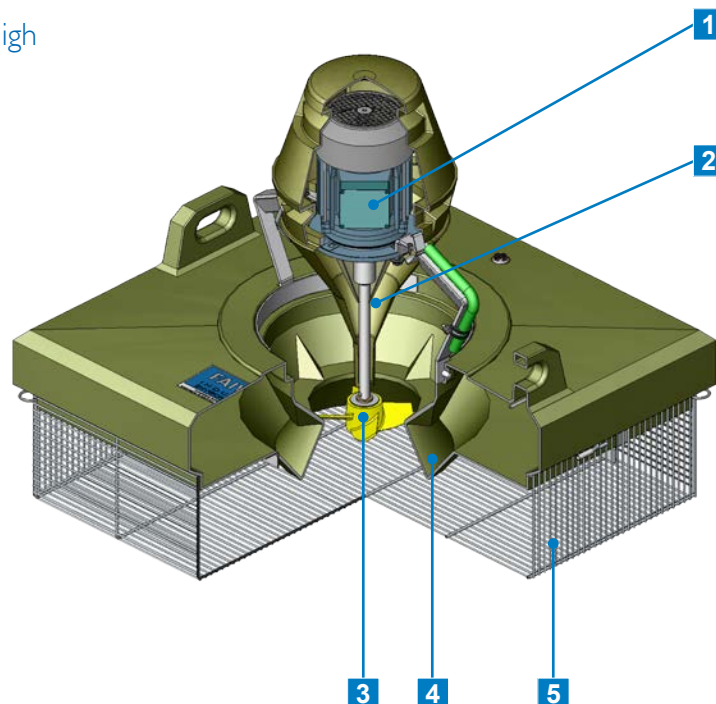

FLOBULL - AERATORS FOR PONDS & LAKES

A single FLOBULL can oxygen from 100 to 1000 m² at a high oxygen rate.

DESIGN FEATURES :

- 1** IP 55 Protected motor (1500 Rpm)
- 2** Cone-shaped water diffuser.
- 3** 4 blades propeller.
- 4** Float made of high density polyethylene.
- 5** Intake grille with 5 or 11 mm spaces (SS.304).

For marine use stainless steel **SS.304** is changed to **SS.316L** - please contact us.

Our technicians can help you to choose the right solution relating to your oxygenation problems.

20 meters of cable are supplied with each aerator, should you need longer, please ask us.

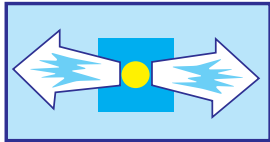

AERATION + CIRCULATION - Surfaces from 100 m² to 1500 m².

Two Kits made of polyester enable FLOBULL to direct water spray in a direction required. They are mounted on the propeller's outlet and prevent water from stratification.

NOTE - The kits can be purchased as spare parts to be mounted on standard FLOBULL you still have.

LONG-JET

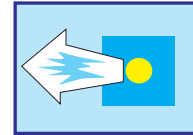

FLOBULL Long Jet makes a long spray from each side of the propeller.

FLOBULL / Long-jet KIT

SINGLE-JET

FLOBULL Single-jet makes a powerful spray in a single side from the propeller, for an hydro current with optimum oxygen gain.

FISH GROW UP IN THE BEST CONDITIONS WITH FAIVRE AERATORS.

FAIVRE aerators are useful to :

- Oxygenate water and discharge gases.
- Diffuse the recycled water through the pond.
- Help a regular growth of your fish.

Since the 60s, FAIVRE has been developing floating aerators. Due to a wide know-how in the water aeration process FAIVRE can easily determine and advise you which kind of aerators you need.

Nowadays FAIVRE is the European leader in floating aerators with more than 10.000 items working worldwide.
