DRUM FILTERS
AN INNOVATIVE AND
HIGH-PERFORMANCE TECHNOLOGY

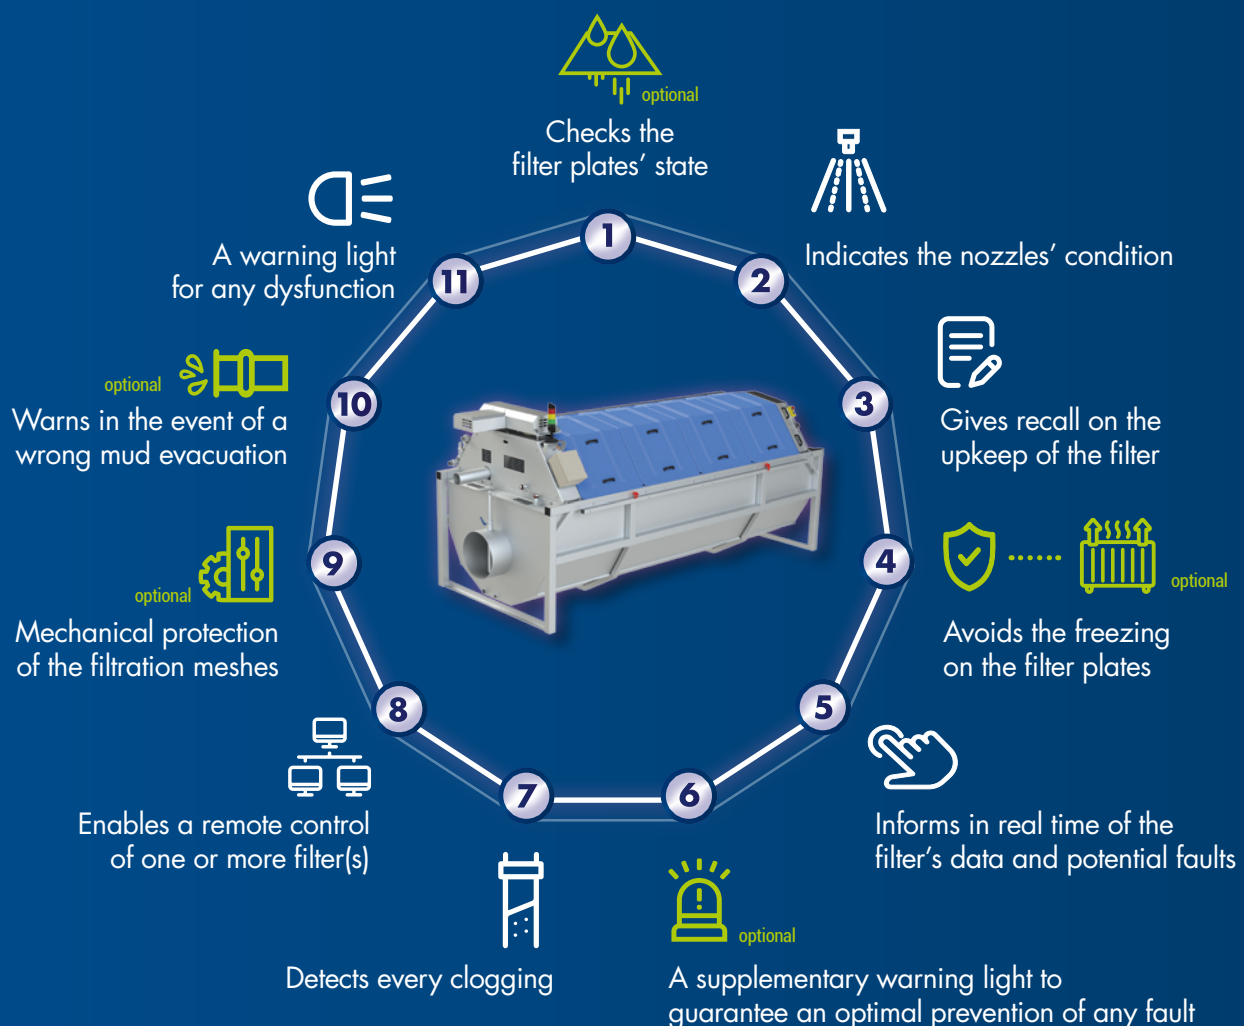

DRUM FILTER / SMART FILTER

DRUM FILTER: AN INNOVATIVE AND HIGH-PERFORMANCE TECHNOLOGY

For over 20 years, the drum filter ROTOCLEAN has become one of the best filters for waste water treatment. ROTOCLEAN, the robust and autocleaning machine, has been made to filter every effluent. With more than 2000 filters sold all around the world, FAIVRE Group has developed 210 models of drum filters.

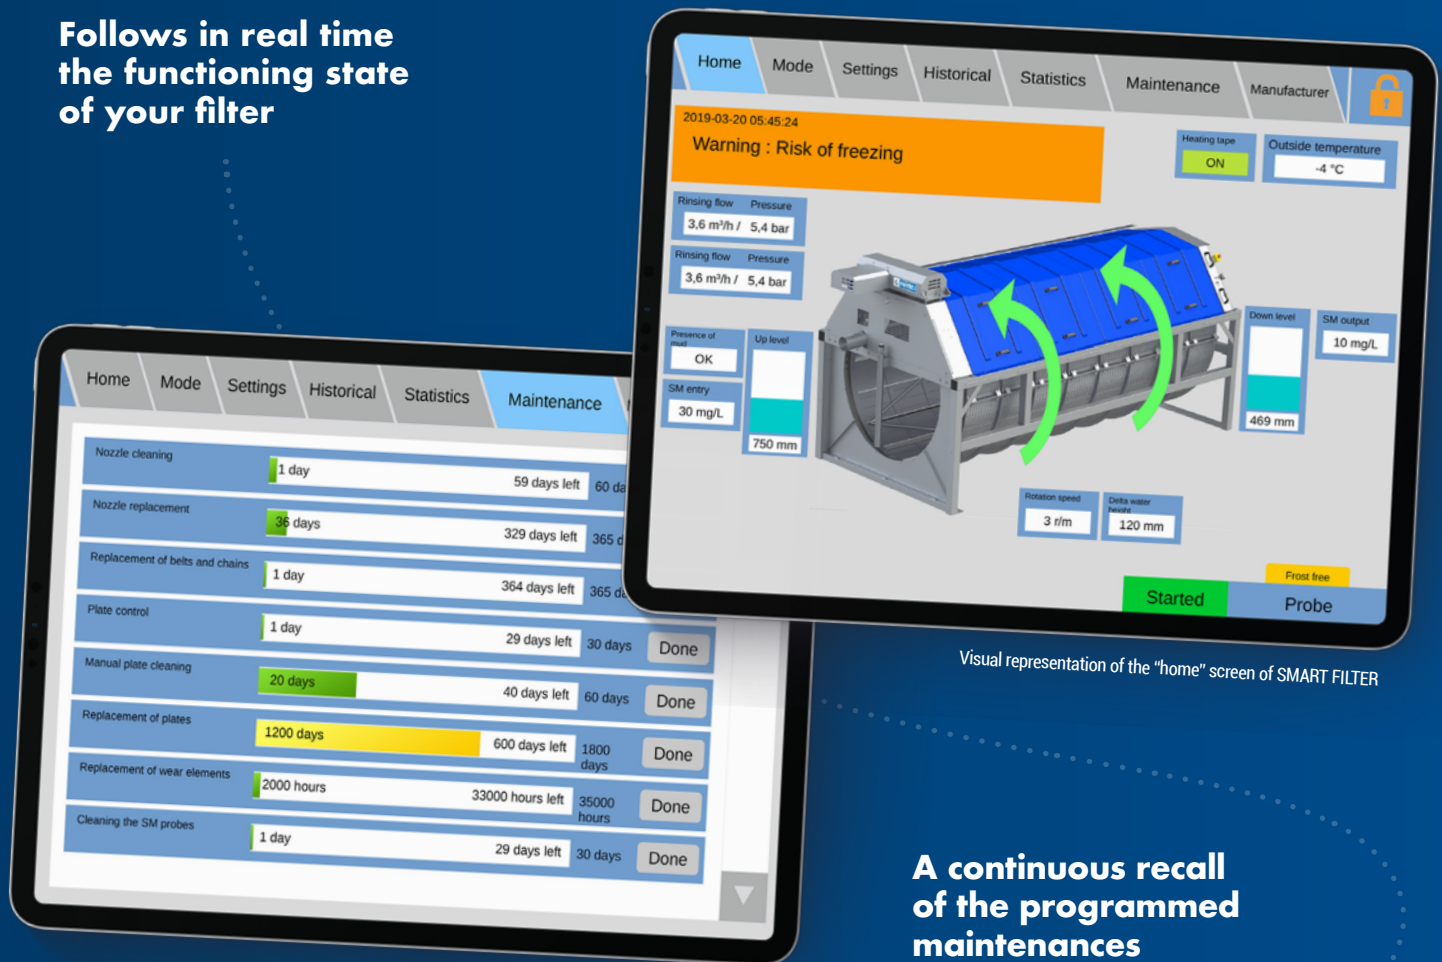

With the international success of ROTOCLEAN, FAIVRE wanted to automatize its drum filter to reduce its maintenance. Thus was born the SMART FILTER: a new generation drum filter. As robust as ROTOCLEAN, the SMART FILTER integrates innovative technologies. Intelligence and timesaver perfectly define the SMART FILTER.

THANKS TO ITS NEW FUNCTIONALITIES, YOU CAN CONTINUOUSLY FOLLOW-UP YOUR SMART FILTER:

DRUM FILTER / SMART FILTER

**Follows in real time
the functioning state
of your filter**

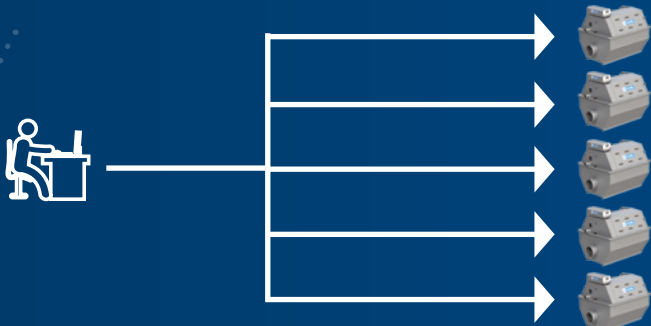

Visual representation of the "home" screen of SMART FILTER

**A continuous recall
of the programmed
maintenances**

visual representation of the "maintenance" screen of SMART FILTER

**Able to control one or
more filter(s) remotely**

**Thanks to its high-end probes, your
SMART FILTER will inform you in case
of any dysfunction**

**SMART FILTER is an economic innovation thanks
to the reduction of its maintenance cost.**

**FOR OVER 60 YEARS
OF EXPERIENCE**
